Cambridge Research Report

- Over the summer, please think about developing a **question** for your research report
 - Your question should:
 - Be individual to you
 - Be interesting (you're spending a year working on it)
 - Be academic in nature
 - Lead to an argument with multiple perspectives
 - Remember that in your research report, you will be required to analyze, evaluate, and reflect on ideas, evidence, and arguments
 - Your question does not need to be global in scope

There's nothing to turn in! All you have to do is think.
